Email: sherry@reflecttolearn.com

Sherry St. Clair is the founder of Reflective Learning LLC, an educational consulting agency based in Kentucky. Her organization works with schools around the world, creating specialized training and coaching services for school administrators and educators. Additionally, Sherry serves as a Senior Fellow for the International Center for Leadership in Education and Houghton Mifflin Harcourt. She holds a master's degree in Instructional Leadership, as well as a Rank I in Instructional Supervision.

As an international consultant, Sherry draws from her rich experience at various levels of public education—teaching elementary school, being an administrator in a high school of 1,300 students, working as a state consultant, and creating and facilitating virtual courses. Sherry is a highly regarded national speaker and consultant, providing educational agencies with expertise in the areas of instructional leadership, effective classroom practices, classroom walkthroughs, effective use of data and guidance on how to create structures for successful classroom coaching. Coaching schools to best meet the needs of all students is Sherry's passion.

Sherry is a contributing author to Effective Instructional Strategies Volume 2 published by the International Center for Leadership in Education. She has published numerous professional learning activity guides and facilitated webinar series focused on leadership and effective instructional practices. Additionally, Sherry developed virtual instructional workshops for the CTE Technical Assistance Center of New York. In partnership with the Successful Practices Network, Houghton Mifflin Harcourt, and The School Superintendent Association (AASA), Sherry has recently been a part of bringing innovative practices to scale. Her latest publication, Coaching Redefined: A Guide to Leading Meaningful Instructional Growth, was released in June of 2019.

Listening Tour Questions

Questions to ask teachers about themselves:

- What are your strengths as a teacher?
- In what ways would you like to grow professionally? What, if anything, has stood in the way of your professional growth and ability to meet goals?
- How can we improve learning for your students?
- How do you hear the voices of your students in your classroom?
- How do you know students are learning in your classroom?
- What has been the most meaningful professional learning experience you've had? Why was it so meaningful to you? How did it help you change instruction?
- Have you been involved in coaching before, and how did you come to get involved in it? What did you think of the experience? How do you feel about having a coach now? (This series of questions will require extra reassurance that the more honest teachers are in their answers, the more they will get out of their experience with you.)
- Is there anything else you feel I should know to help me serve you best as your coach?

Questions to ask teachers about school culture:

- What do you feel is the greatest strength of the school?
- Do you feel your school is growing, evolving, and improving?
- What aspect of the school needs to grow the most and why?
- How do you hear the voices of students in the school?
- How do you hear the voices of parents and the community in the school?
- Is equity important in your school? If so, how is it addressed?
- How do you feel the school prepares students for careers and college?
- How do you feel supported in your professional growth and development? Who or what is most supportive?
- How do you feel about the demands currently placed on you and your colleagues? Are they reasonable or do they feel impossible to meet? Please explain.
- Would you describe the school as one that sticks with a few initiatives or one that cycles through many initiatives? Please explain.
- What resources are you most grateful to have? What resources do you wish you had?

Listening Tour Questions

Continued from previous page

Questions to ask students about their learning:

- Do your classes feel hard to you? If they are hard, what makes them hard? If they are easy, what makes them easy?
- Do you know why you're learning what you're learning?
- Do you think what you are learning will be helpful to you in your future, while you're still in school, and after you've graduated?
- Do you feel that your school values and rewards academics or sports or both? Or something else?
- Are your learning successes celebrated? If so, how?
- When you are in a class where you are having fun, being challenged, and learning a lot, what about the class makes it so engaging?
- When you are bored in school, why are you bored?

Questions to ask students about school culture:

- What makes you most proud to be a student at this school?
- If you could change something about the school, what would it be?
- Do you think that the school tries to give the same opportunities to all different kinds of students? Why?
- When students have ideas, do you feel that the adults in your school are open to hearing and considering them?

Questions to ask parents/guardians about their child's learning:

- Is your child's learning rigorous, where rigor can be defined as requiring complex and deep modes of thinking (e.g., analyzing, synthesizing, and/or evaluating information; creating new ideas, concepts, solutions, etc.)? If yes, what makes it rigorous?
- How relevant is your child's learning to her future? Please explain.
- How is your child academically supported at school?
- Is your child engaged in school?
- Is your child learning interpersonal/social-emotional skills and today's career skills? If yes, how are these skills taught, and which ones are taught?

Listening Tour Questions

Continued from previous page

Questions to ask parents/guardians about school culture:

- Do you feel that your voice and input are wanted, solicited, valued, and heard at the school, and how?
- Can you think of a time something at the school was changed because of parent feedback?
- Would you describe the school as one that is eager and open to changing instruction and programs as college, career, and technology demands change?
- How does the school communicate with you, and how often? What are they communicating? Are there ways they could communicate more effectively with you?
- Does the school give equal opportunity to all students? Does the school seem to value equity? If not, what makes you say this?
- Does the school show it cares about your child's emotional well-being? If yes, how do they show this?
- Do you feel the school values and rewards academics? Sports? Something else? How, and how often?
- What makes you most proud to send your child to this school?
- If you could improve one thing about the school, what would it be?
- Is there anything else you feel is important for me to know?

Questions to ask community members about the school:

- In your experience, are school graduates prepared for careers?
- Do graduates show the necessary academic and technical skills for success in careers? If yes, how?
- Do graduates possess the interpersonal/social-emotional and professional skills for success in careers? If not, what are they lacking?
- Are current and past students polite and well behaved in the community? Do they show a sense of social responsibility?
- In general, do you feel confident handing over your community to the school's next generation of graduates? If so, why? If not, why not?
- In your experience, does school leadership show a sincere concern for the achievement and wellbeing of its students and their capacity to be productive members of your community?
- If you have ever tried to engage with school leadership to bring forth improvement and change, do you generally find them open to ideas and collaboration?

Most Valuable Career Skills by 2025

Per the annual World Economic Forum report, the most valuable career skills by 2025 will be the following 10 skills:

- 1. Analytical thinking and innovation:** In order to find creative solutions, you review new and possibly complicated information, examine that information to ensure it's factual, use reasoning skills to determine if the information follows a logical pattern and determine causes and effects.
- 2. Active learning and learning strategies:** Utilizing strategies that work best for you, active learning requires you to evaluate what you know, understand what you need to know and have the initiative to learn that information through various means.
- 3. Complex problem solving:** To solve complex problems requires being able to identify the problem, evaluate all pertinent information and factors, consider a range of possible solutions, think critically through different solution options and their potential outcomes, and then make a judgment as to which solution to select. A series of skills go into complex problem solving, including observation skills, analysis, creativity, innovative thinking, evaluation, perseverance, and resilience, to name some.
- 4. Critical thinking and analysis:** To think critically is to think deeply. Critical thinking requires that you first suspend judgment to evaluate all related factors and perspectives as objectively as possible. It entails taking time to think through what you might not be considering or yet seeing. Reason, logic, and judgment are all used to analyze and evaluate information to, ultimately, probe far beyond the surface of the matter at hand.
- 5. Resilience, stress tolerance and flexibility:** Through self-management, you are able to develop coping mechanisms to overcome and adapt to challenges in a healthy manner. By strengthening the five pillars of resistance- self-awareness, mindfulness, self-care, positive relationship and purpose -you can be more emotionally, mentally and behaviorally flexible and adjust to both the internal and external demands.

6. **Creativity, originality and initiative:** To be creative is to imagine something new from the information and data available. Creativity emerges from a capacity to view the world differently, connect seemingly disconnected dots, and unearth unseen patterns to conceive something new. To be creative is to apply critical thinking and empathy to imagine experiences, ideas, and things from other perspectives. With your creative skills, you take the initiative to make something original.
7. **Leadership and social influence:** Through the use of leadership skills-trustworthiness, reliability, organization skills, interpersonal and social skills- you are able to maximize the efforts of those around you towards the accomplishment of a common goal.
8. **Reasoning, problem-solving and ideation:** In a logical way, you are able to understand the problem and move from a hypothesis to a conclusion. You use information to solve complex problems and generate logical and potential solutions.
9. **Technology, design and programming:** Utilizing a combination of text, graphics and style elements, you are able to logically and purposefully create new technologies.
10. **Technology use, monitoring, and control:** technologies Remotely, you are able to monitor and manage technology to ensure it is working properly at all times. If it is not working properly, you are able to utilize problem-solving skills in order to fix it.

Coaching Through Resistance

Possible Causes	How Coaches Can Help
1 People just lack the motivation to change. <i>High Resistance to Change</i>	
<ul style="list-style-type: none"> • Exhaustion • Overwhelmed • Might no longer see themselves as people capable of climbing over the exhaustion 	<ul style="list-style-type: none"> • Take goals and break them into smaller more manageable steps. • Use positive social pressure (i.e. asking all teachers to share a strategy they tried at the next meeting). • Have private conversations with those who still resist change even after your otherwise successful efforts to motivate people. • Reassure them you are a safe place where they can share their fears. • Don't allow them to slow the momentum of the school or let their resistance become an endpoint for school-wide growth. • As a coach, maintain control and do not let go of the goal.
2 People don't believe there is a need for change. <i>High Resistance to Change</i>	
<ul style="list-style-type: none"> • A problem of logic exists • Exacerbated by data 	<ul style="list-style-type: none"> • Coach struggling to break it down the need for change logically and persuasively. • Use the data to strike an emotional chord. • Show them how a problem might snowball and impact actual lives.
3 "We've never done that before." <i>High Resistance to Change</i>	
<ul style="list-style-type: none"> • People are prone to resisting steps they've never taken before. • No proof it will work • Seen as a waste of time • Common to see this where there is a high fear of failure 	<ul style="list-style-type: none"> • Look for threads in the environment or past initiatives that relate to what you are sharing. • Anchor the unfamiliar in the familiar. • Try fitting the new into a pre-existing structure.
4 People were enthusiastic but then lost momentum. <i>Medium/High Resistance to Change</i>	
<ul style="list-style-type: none"> • Disappointment in results to date can cause people to lose faith in themselves and/or their colleagues • Results of change efforts do not materialize as quickly as people expected or wanted 	<ul style="list-style-type: none"> • Remind teachers how far they have come up to this point. • Enumerate and praise specific achievements where possible. • Teach a growth mindset. • Support momentum by reminding people that they are achieving objective and are getting closer to goals every day.
5 People are stuck in analysis paralysis. <i>Medium Resistance to Change</i>	
People are so inundated with data and can't see a way out.	<ul style="list-style-type: none"> • Pick an exit point (no matter how small or unsure) then use emotion to convince people to take a leap and try a solution.

Possible Causes	How Coaches Can Help
6 “I’ll get to that change tomorrow.” <i>Medium Resistance to Change</i>	
<ul style="list-style-type: none"> • Sometimes procrastination is at the root of resistance. • Usually a symptom of being overwhelmed 	<ul style="list-style-type: none"> • Shrink the problem down so it can’t overwhelm. • Put the big picture aside and ask teachers to think about one thing they can do this week. • If they still resist, ask, “What can you commit to try this week?” • Build in accountability. • Ask them to report back to you how it went. • The main point is to get people to do the task, not assess it.
7 People are certain “it will never work.” <i>Medium Resistance to Change</i>	
<ul style="list-style-type: none"> • Might no longer see themselves as people capable of climbing over the exhaustion • People have been inundated with initiatives. 	<ul style="list-style-type: none"> • Show them it will work. • Prove them wrong, with patience and empathy. • Acknowledge concerns and fears, but don’t let them stay there. • Look for schools where “it” is working and visit or do a video conference. • Find a classroom to visit where “it” is working. • Find ways to give voice to educators who are well developed in this area. • Look to other schools to visit or do video conference.
8 “We know we should be doing this, but we’re not.” <i>Medium Resistance to Change</i>	
<ul style="list-style-type: none"> • Knowing isn’t enough • Often stems from exhaustion 	<ul style="list-style-type: none"> • Break down plans into smaller, more manageable parts. • Collaboration and accountability can be very powerful here. • Suggest people work in pairs or teams to build in natural accountability.
9 Most people agree change is needed, but nothing is happening. <i>Medium Resistance to Change</i>	
<ul style="list-style-type: none"> • People cannot see the path forward due to lack of clarity. • People only see a roadblock. 	<ul style="list-style-type: none"> • Make the end goal explicit and understood. • Vision Cast • Work from a series of smaller goals to light the path. • Look for roadblocks that could be standing in their way. • Refocus educator on growth mindset. • Make sure you, as the coach, believe in your colleagues’ abilities and express it to them.

*Based on the work from *Coaching Redefined: A Guide to Leading Meaningful Instructional Growth* by Sherry St. Clair and *Switch: How to Change Things When Change is Hard* by Chip Heath and Dan Heath.
